

Anexa B.1.13 - Oferte pe piața muncii în domeniu

1. Selecție de oferte de pe site-ul www.linkedin.com

The screenshot shows a list of job offers on LinkedIn. The second offer, 'Engineer, FPGA Design' by Analog Devices, is circled in red. To the right, the details for this job are displayed:

Engineer, FPGA Design

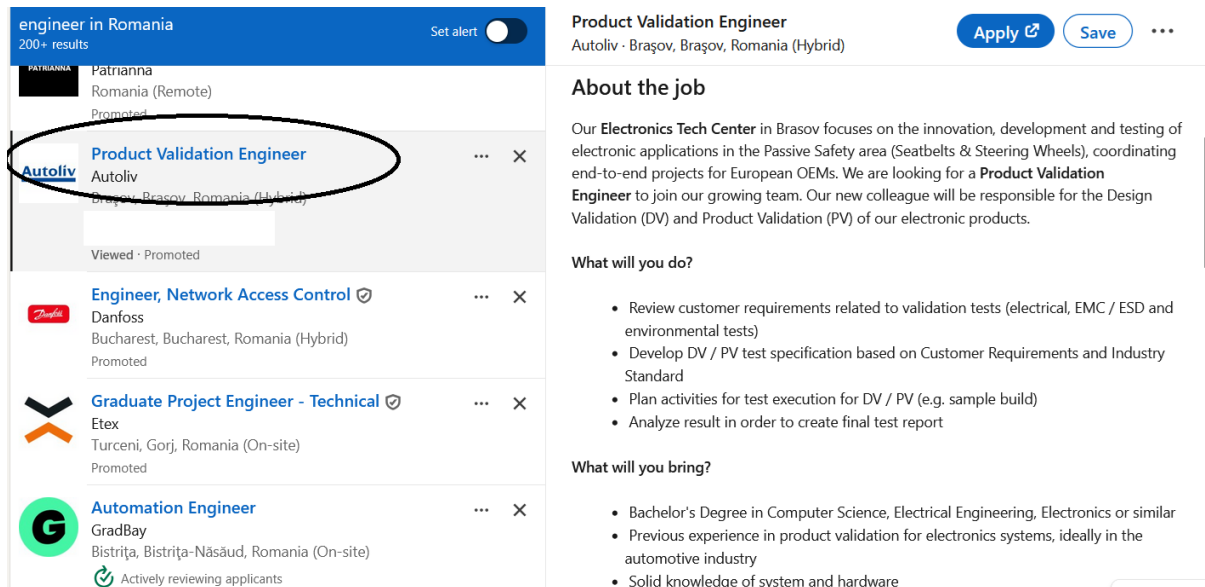

Analogue™. Learn more at www.analog.com and on [LinkedIn](#) and [Twitter \(X\)](#).

Analogue Devices (ADI) is seeking a FPGA Design Engineer to join our solutions team that supports a broad range of industry leading high-performance linear solutions and standard products in end applications such as industrial automation, instrumentation, automotive, healthcare and communication systems.

The FPGA Design Engineer is responsible for developing embedded digital designs interfacing our products targeted on various FPGA devices. As part of a cross functional team, the FPGA Design Engineer performs definition, development, implementation, and documentation of the designs, supports the hardware and software teams in system testing, bring-up and debug; and provides technical support for our global customers.

Responsibilities include:

- Implement FPGA designs targeting ADI's converter technology
- Develop HDL designs on commonly available FPGA evaluation platforms, demonstration systems
- Support the hardware and software teams in system level definition, testing, debugging, and troubleshooting
- Develop design documentation, application notes, How-To guides, and technical

The screenshot shows a list of job offers on LinkedIn. The second offer, 'Product Validation Engineer' by Autoliv, is circled in red. To the right, the details for this job are displayed:

Product Validation Engineer

Autoliv · Braşov, Braşov, Romania (Hybrid)

About the job

Our **Electronics Tech Center** in Brasov focuses on the innovation, development and testing of electronic applications in the Passive Safety area (Seatbelts & Steering Wheels), coordinating end-to-end projects for European OEMs. We are looking for a **Product Validation Engineer** to join our growing team. Our new colleague will be responsible for the Design Validation (DV) and Product Validation (PV) of our electronic products.

What will you do?

- Review customer requirements related to validation tests (electrical, EMC / ESD and environmental tests)
- Develop DV / PV test specification based on Customer Requirements and Industry Standard
- Plan activities for test execution for DV / PV (e.g. sample build)
- Analyze result in order to create final test report

What will you bring?

- Bachelor's Degree in Computer Science, Electrical Engineering, Electronics or similar
- Previous experience in product validation for electronics systems, ideally in the automotive industry
- Solid knowledge of system and hardware

About the job

Build the Systems That Keep Modern Manufacturing Moving

If you studied Electrical Engineering, Mechatronics or Industrial Automation because you wanted to work with real machines, real systems and real technology this is where it starts properly.

This is not a theory-based graduate role.

This is hands-on automation inside a live manufacturing environment.

You will work on automated panel manufacturing systems, industrial control equipment and production line optimisation. You will see how PLC logic, electrical systems and automation performance directly affect output, efficiency and reliability.

From day one, you are treated as a developing automation engineer.

What you will be doing

As a Junior Automation Engineer, you will:

- Support the design, testing and maintenance of automated manufacturing systems
- Monitor system performance and assist in diagnosing failures
- Repair and maintain electrical and automation systems within machines and production devices
- Support production line efficiency improvements

About the job

Candidatul Ideal

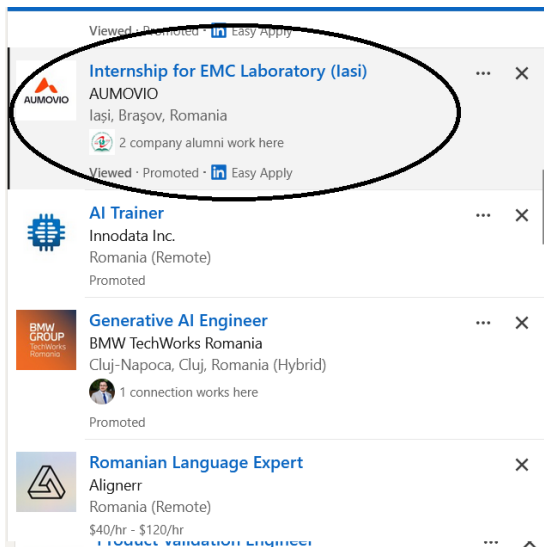

- Studii tehnice superioare (electric, electrotehnic);
- Cunoștințe legate de tehnicile de design, instrumente și principii implicate în producția planurilor tehnice, a schițelor, desenelor și modelelor;
- Cunoștințe privind sisteme electrice și tablouri electrice;
- Cunoștințe de limba engleză;
- Abilități foarte bune de comunicare și de a găsi în timp util soluții la problemele existente;
- Capacitate de a lucra independent și eficient;
- Reprezintă avantaj experiența demonstrabilă de cel puțin doi ani ca inginer în proiectarea instalațiilor electrice pentru industria terestră și/sau navală.

Descrierea jobului

- proiectează instalații electrice navale;
- stabilește detalii și oferă soluții tehnice în cadrul proiectelor conform regulilor societăților de clasificare;
- utilizează programe de proiectare asistată pe calculator (Eplan, Autocad);
- asigură suport tehnic echipelor de instalare, execuție tablouri și commissioning;

review process.

- Support production line efficiency improvements

If you're interested in enhancing your testing, technical and troubleshooting skills, our team values talent, learning and personal growth.

Do you want to be a Internship for EMC Laboratory? These should spark your interest:

- Is responsible to assist of different EMC tests;
- Assist to small design activities and laboratory improvement projects;
- Assembly of various test setups and test modules for different projects;
- Is responsible for logistic activities (packaging, handling, delivery and tracking) of packages;
- Assist monthly verification of some equipment and test chains
- Offers support for test engineers and equipment maintenance.

A mentor will support you to stepwise take over own responsibility after an initial training phase which will familiarize you with our products, tools, processes and organization.

Qualifications

You can be a perfect match to our team if you have:

- Ongoing University Degree in technical fields (e.g. Electronics, Electrotechnics, Telecommunications);

Locație: Timișoara

Tip job: Full-time, la birou (on-site)

Suntem UPfit.cloud, o companie românească de tehnologie care dezvoltă soluții software pentru cluburi de fitness din întreaga lume. Lucrăm cu clienți B2B din România, Ungaria, Serbia, Croația, SUA și Emiratele Arabe Unite și ajutăm afacerile din fitness să fie mai eficiente prin tehnologie.

Suntem într-o etapă de creștere și ne dorim în echipă oameni curioși, pasionați de tehnologie și dornici să învețe. Dacă îți place PHP-ul, ai scris cod pe cont propriu sau în facultate și vrei să devii un developer bun, nu „doar să bifezi task-uri”, s-ar putea să fim locul potrivit pentru tine.

Căutăm un Junior Web Developer PHP & MySQL care să se alăture echipei noastre de Software

Role Overview

We are seeking a solution-oriented engineer passionate about building digital products that solve real business problems for Small & Medium Enterprises. The role focuses on developing intelligent business applications using Microsoft Power Platform and AI technologies, including OpenAI integrations.

Responsibilities

- Design, develop and deploy business applications using Microsoft Power Apps, Power Automate and Power BI.
- Build and integrate AI-powered components using APIs (OpenAI, Azure AI Services or similar).
- Translate business requirements into scalable technical solutions.

✓ Aplică

YOUR PROFILE

We are looking for a Junior Automation Developer with initial real-world exposure to RPA (UiPath) and/or BPMS solutions—someone who already understands what automation work looks like in practice and is ready to grow fast in a supportive, learning-driven environment

- 1 – 2 years of hands-on experience in developing RPA solutions in UiPath
- Exposure to real-life projects (professional projects, internships with delivery responsibility, or operational automations)
- Understanding of conceptualizing processes and transferring them to software applications (process analysis, process documentation)
- Understanding of automation lifecycle
- Experience with REFramework
- Basic scripting or programming knowledge (e.g., Python, Java, C#, JavaScript)
- Advanced level of English language
- Proactive, solution-oriented mindset with the ability to influence stakeholders.

Nice to have

- Experience in BPMS / workflow automation (e.g. Camunda/Appian/Bizagi)
- UiPath UiARD certification

WHAT WE OFFER

- A strong learning environment with mentorship from experienced automation professionals
- Real projects that allow you to grow quickly and build meaningful expertise
- Exposure to both technical development and business processes
- A collaborative, open team culture that values curiosity and improvement

Job Description

We are looking for a motivated and detail-oriented **System Test Engineer Intern** to join our team. In this role, you will support system-level validation activities. You will gain hands-on experience with test execution, test design, and automation while working closely with experienced engineers in a collaborative environment.

Do you want to work as an System Test Engineer Intern? These should spark your interest:

- **Running system test cases** on automotive project requirements;
- **Designing and creating new test cases**, ensuring coverage of both functional and non-functional scenarios;
- **Automating existing test cases** using our internal automation framework;
- **Documenting results**, reporting issues, and supporting defect investigation activities;
- **Collaborating with the team** to ensure high-quality testing and consistent execution;
- **Contributing to knowledge-sharing sessions** and participating in continuous improvement initiatives.

A mentor will support you to gradually take over own responsibility after an initial training phase which will familiarize you with our products, tools, processes and organization.

Qualifications

You can be a perfect match to our team if you have:

- **University student** in Electronics, Computer Science, Electrical Engineering, Mechatronics, Automation, or a related technical field;
- **Good programming knowledge** (C/C++, Python or similar) is considered a strong plus;
- **Basic electronics knowledge**;
- **Very good English skills**, both written and spoken;
- **Analytical mindset**, attention to detail, and willingness to learn;
- Committed to teamwork and to maintaining consistency through structured testing processes

Job Description

This Business Area Architecture and Networking Solutions develops modules and end-to-end systems for connected mobility along the strategic elements "Network. Inform. Integrate.", i.e. hardware development and validation. By providing solutions for networking, human-machine interaction, system integration and door control unit for cars, commercial vehicles and fleets, Vehicle Networking and Information ensures functioning networks and a smooth flow of information for connected mobility.

Do you want to be a Hardware Intern for ANS? These should spark your interest:

- Contributing in designing, calculation, simulation, software - hardware interface and documentation of electrical modules and schematics for embedded systems according to product specification and defined processes;
- Contributing in the development of test tools;
- Creating and optimizing the layout designs for low-medium complexity projects;
- Following the required guidelines and processes (design, EMC and manufacturing);
- Offering support in creating/modifying of schematic;
- Creating test specifications and executing electrical testing and validation according to defined requirements and specifications;
- Creating the hardware inputs for Production Test Specification;
- Creating test specifications and executing electrical testing and validation according to defined requirements and specifications;
- Understanding the EMC test specification and contributing to test execution;
- Understanding the requirements for embedded systems;
- Understanding the architecture of embedded systems.

A mentor will support you to gradually take over own responsibility after an initial training phase which will familiarize you with our products, tools, processes and organization.

Qualifications

You can be a perfect match to our team if you:

- Are an active student pursuing a university degree in a relevant field (i.e. Electronics, Automatics, Mechatronics, Electrical Engineering);
- Have knowledge of analog/digital electronic design;
- Know software tools for hardware design (schematic, calculation, PCB design tools and simulation tools);
- Have knowledge of embedded systems architecture;
- Are familiar with relevant EMC;
- Are familiar with PCB design guidelines;
- Are familiar with PCB manufacturing and assembly processes;
- Good English skills, both written and spoken;
- Professional experience is a plus but not mandatory.

Trainee Inginer Electricitate

Delgaz Grid | Iași, Bacău, Botoșani, Piatra Neamț, Suceava, Vaslui

**De 20 de ani, energia noastră
începe cu oameni ca tine.**

De ce să alegi GraduatE.ON?

Pentru că e mai mult decât „un job”. La GraduatE.ON îți testezi ideile, explorezi domenii diferite și înveți direct de la oameni care chiar știu ce fac. De 20 de ani creștem generații de profesioniști - peste 180 de trainee au început aici și și-au scris propria poveste.

Fii parte din echipa noastră:

- **Siguranță și stabilitate** - Începi cu contract pe perioadă nedeterminată, într-un colectiv pentru care securitatea și sănătatea în muncă sau grija pentru mediu au devenit valori intrinseci culturii companiei noastre, iar salariul competitiv și beneficiile îți oferă stabilitate pe termen lung.
- **Libertatea de a explora** - Nu te limităm la un singur rol. Ai ocazia să testezi arii diferite, să lucrezi în echipe diverse și să îți descoperi direcția profesională înainte de a o alege definitiv.
- **Dezvoltare reală, nu doar promisiuni** - Un program de până la 24 de luni, cu mentor dedicat, traininguri relevante și proiecte cu impact.

Te vezi Inginer în lumea energiei? Atunci este momentul potrivit să te alături programului Graduate E.ON

Dacă ai energie, curiozitate și îți place să explorezi, rolul de **Trainee Inginer Electricitate** ar putea fi exact ce cauți. Nu trebuie să ai toate răspunsurile - important e să ai drive-ul să le găsești.

Căutăm oameni ca tine!

- Ești în ultimul an de licență sau master într-unul din domeniile Energetică, Electrotehnică sau arii conexe?
- Te-ai implicat în organizații studențești, voluntariat sau proiecte extra?
- Te descurci bine cu Microsoft Office și limba engleză?
- Ești deschis la mobilitate și relocare pentru stagii în diferite orașe?
- Îți place să lucrezi în echipă, ai gândire analitică și comunică clar?

🔦 **Vrei să faci parte dintr-un program care te ajută să îți descoperi direcția profesională?**

👉 **Aplică acum și pornește pe traseul tău în energie!**

Oferim:

Un start care contează. Contract pe perioadă nedeterminată încă de la început și un pachet de beneficii solide: tichete de masa, asigurare medicală privată, pensie privată, primă de vacanță suplimentară salariului pe perioada concediului de odihnă și multe altele.

Acces la traininguri relevante și participare la evenimente din industrie.

Un mentor dedicat care te ghidează pas cu pas și te ajută să-ți accelerezi creșterea profesională.

25 de zile de concediu anual

Descriere completă a locului de muncă

Arcadis is the world's leading company delivering sustainable design, engineering, and consultancy solutions for natural and built assets.

We are more than 36,000 people, in over 70 countries, dedicated to improving quality of life. Everyone has an important role to play. With the power of many curious minds, together we can solve the world's most complex challenges and deliver more impact together.

Role description:

As an Electrical Graduate Engineer, you will work closely with experienced engineers in a supportive learning environment. We will continue to develop your existing skills to apply electrical engineering principles in real projects, use industry-standard tools, and contribute to high-quality design deliverables.

How You Will Contribute:

Graduate Electrical Engineer

lighting, power distribution, and basic low-voltage systems such as fire detection, CCTV, and security systems.

- Prepare engineering calculations, sketches, schematic designs, 3D models, and working drawings for different project phases.
- Build on existing proficiency in Revit and other electrical design and calculation software.
- Prepare technical reports and presentations.
- Follow company standards, procedures, and design quality-check processes.
- Manage assigned tasks within agreed timelines and budget while working in a structured project environment.
- Apply safety-in-design principles ensuring system accessibility, maintainability, coordination, and buildability are integrated into your design decisions.

Qualifications and Experience:

Mandatory

- Bachelor's degree in electrical engineering, building services, or a related field.
- Knowledge and understanding of electrical systems for buildings.
- Knowledge of norms and standards related to electrical engineering for buildings.
